Environmental Health & Safety

Construction Programs

Comprehensive
Compliant
Concise

The very best in consulting.

OSHA Consulting

Auditing

- Recordkeeping
- Personal Protective Equipment
- Cranes, Derricks and Rigging
- Excavation and Trenching
- Electrical Safety
- Fall Protection
- Scaffolding

Program Development

- Site-Specific Safety Plans
- PPE Hazard Assessments
- Job Safety Assessments
- Fire Protection Programs
- Confined Space Entry
- Electrical Safety
- Lockout/Tagout
- And more...

Please ask us about any services that are not listed.

Construction Dewatering

- **Permitting** - Prepare and submit permit applications
- **System Selection** - Work with a variety of vendors to select and design cost-effective dewatering treatment systems
- **System Operations** - Day-to-day operation and maintenance of dewatering treatment systems
- **Sampling** - Sample Plan development and effluent sampling of dewatering systems to verify compliance with permit conditions and limitations

Site Investigation and Remediation

- **Site Assessment** - ASTM phase I and II site assessments to determine environmental risks associated with your site
- **Remedial Design** - Design and implementation of cost-effective treatment systems and programs
- **System Maintenance** - Cost-effective operation and maintenance of treatment systems

Training

Safety

- OSHA 10 and 30 hour courses
- 8, 24, and 40 hour HAZWOPER
- Emergency Preparedness and Response
- Control of Hazardous Energy (LOTO)
- Excavation and Trenching
- Fall Protection
- Confined Space

Environmental

- Storm Water Management
- Hazardous Waste Management
- Spill Prevention, Control, and Countermeasures (SPCC)
- Hazardous Materials Transportation
- Asbestos Awareness

Instructors

- Years of practical experience in safety and environmental compliance
- Understand regulatory requirements
- Use leading edge training techniques to ensure understanding and retention
