

## INTRODUCTION

Since founding Aquionix in 1998, Mr. Cardwell has worked tirelessly to ensure Aquionix consistently exceeds its customer's expectations. Mr. Cardwell's consulting activities focus on the development of compliance management programs and systems in the mining, oil and gas, beverage and manufacturing industries.

## EXPERIENCE

Mr. Cardwell's experience includes extensive work with international mining operations, large natural gas and oil production companies, state and local government agencies, the international food and beverage industry and a myriad of small to medium size companies in the trucking, petrochemical, medical, aerospace, pharmaceutical, manufacturing and waste management industries.

Specific experience includes:

- Development, implementation and auditing of ISO 14001, OHSAS 18001, and ISO 9001 management systems.
- Reclamation planning, permitting and management.
- Development and implementation of spill prevention and stormwater management programs.
- Management of drinking water programs.
- Wastewater system permitting and reporting.
- Regulatory compliance auditing.
- Environmental and safety compliance program design, development and implementation.

## PERSONAL STRENGTHS AND SPECIALTIES

Mr. Cardwell's strength lies in his ability to facilitate the efficient and effective organization, communication and implementation of projects. Specifically, Mr. Cardwell has the knack for balancing the minutia inherent in large environmental projects with their overarching goals and associated targets, time-frames and budgets.
